

Life Is Already Fading

Renegade Five

Fading, life is already fading
What could I do, it's written all over
I was failing.
I was cold but tried to stay tall
In a world of confusion
That a day we're leaving this game
And I got what I came for
Break it down, found out the truth
You left without knowing
Out. Where did you go... Out!
Where did you go

Life is already fading
You got me to face it
I feel I'm falling to pieces
Life I had with you, is already fading

When you raise your hands in the sky
You can feel the pollution
You feel sick because of the lies
And I know how you'r feeling
You better run faster than me
Cause I got all the anger
Pull me down Try to get out
And save me from falling
Down..Where did I go...down
Where did I go

Life is already fading
You got me to face it
I feel I'm falling to pieces
Life I had with you, is already fading
Life is already fading, you got my to face it
Life is already fading

I will try to find a way from here
Nothing's gonna to stand in my way
Fear got hold on me tonight
My life is already fading

Life is already fading
You got me to face it
I feel I'm falling to pieces
Life I had with you, is already fading
