

# The Next Generation

## Renegade Five

Here you stand just 20 sec. Front of me  
And your hot like fire  
I see myself this is what I used to be  
I'll show you fascination  
And now you feel it, burning inside you  
Burning so deep,  
You can't feed so much hunger  
It takes you higher, and all that you wait for  
You belong to a world full of changes

What I see in your face is just what you are  
The next Generation  
Use the world and become like you're divine  
The next generation  
Go, take it away  
Use it som other place  
This thing is waiting for me  
The next generation  
Go, go come on  
This is the way you are  
The next generation

You are the youth, reaching out to touch the sky  
And you think you'll make it  
You wanna see, everything that is to be  
All across the nation  
And now you feel it, burning inside you  
Burning so deep,  
You can't feed so much hunger  
It takes you higher, and all that you wait for  
And you know that no one could break you

What I see in your face is just what you are  
The next Generation  
Use the world and become like you're divine  
The next generation  
Go, take it away  
Use it som other place  
This thing is waiting for me  
The next generation  
Go, go come on  
This is the way you are  
The next generation

Rise and fall, do it again  
Never give up, You gotta fight to the end  
When you begin, You'll make a change  
You are the youth, Don't you blow it away  
Don't blow it away, That's all that I say  
Don't you blow it away.....

What I see in your face is just what you are  
The next Generation  
Use the world and become like you're divine  
The next generation  
Go, take it away  
Use it som other place

This thing is waiting for me  
The next generation  
Go, go come on  
This is the way you are  
The next generation
