

Calm Before The Storm

Restless Heart

Well you blow through here
Like you own this town
Like a hurricane
You never touch down
I hear the sound of the thunder
I start to tremble slow
I know it won't be long until the whole thing blows

[CHORUS:]

Somebody's gonna get hurt
Somebody's gonna go down
Just when you think it's over
It's gonna come back around
You're just headed for trouble
Don't say you haven't been warned
You'd better get out on the double
It's just the calm before the storm

You've got nobody
You can call your own
Everything you touch
Just turns to stone
Someday you're gonna wake up
And it'll all be gone
And you'll realize everything you did was wrong

[REPEAT CHORUS]
