Everything After

Slipped away to the open Watched the shadows deface the groud Till the day we all Belive that we might lose control

Will the moment we fear Turn to everything clear

After you're gone Away from the life Of the planet you're on And everything after

Faded awake Somebody spoke When I left here today And everything after (2x)

It pulls us back into orbit When disorder surrounds this place And it brings us down We can't keep our feet on the groud

Until the moment we fear Turns to everything clear

We are down here We are Space Revis
