Spin

I can see your inner motive When you wear it on your face Indesposed to the world You won't let yourself be saved

Your the hand that spins my revolver around When you push me away (2x)

On the waves of an ocean I'm a space God in the rain In the arms of devotion Where you never found your place

You need no one to spin your revolver So go and get my gun (2x)

I can see shes falling faster Running to her own disaster

You push me away

I can see shes falling faster Running to her own disaster

You push me away
