

Sway

Rhodes

Cold minded, even the straight lines start to sway
Blind sighted, everyone seems so far away
We were just out here walking
I don't how we came to stop here

Oh stay, sway together, sway together
Stay, sway together.
When were high up above and the night is all blind.
When were high up above and the night is all blind.

Cold breeze, knowingly whisper close to me
Tall trees, cover the lines where people meet
We were just out here walking
I don't how we came to stop here

So stay, sway together, sway together
Stay, sway together.
When were blinded now
When were blinded now
When were high up above and the night is all blind
When were high up above and the night is all blind

So stay, sway together, sway together
Stay, sway together.
Hold me tight.
