

Degeneration

Richie Kotzen

People have got to wake 'cause time is runnin' out
We are a product of our fear...
it may be too late, to change what's come and gone
but you can start with what you feel is right..
I'll be you know the name of who you're gonna face,
but we're too far gone for god to save...
it's slowly come to this..this place you can't escape...
I have to say it but we're goin' down...

Degeneration the future is lost in a loie
its just a sigh of the times...
Degeneration the past is all that is alive,
Condition critical here..
Degeneration

A child is born to learn, what life is all about
Instead is brown out by scars and tears...
What hard work once could earn
is free claim with a gun,
its a shame to live a life in fear..

I'll bet you live the way that I've been talkin' bout
I hate to tell you but you're gonna die...

Degeneration the future is lost in a loie
its just a sigh of the times..
Degeneration the past is all that is alive
No makin' up for the time that we kill
Degeneration the future is lost in a loie
its just a sigh of the times..
Degeneration the past is all that is alive,
Condition critical here..
Degeneration

A people hel;d down just because of rare or creed
livein' a life style they just don't wanna be..
in life a time to try we try we lermenate
tell me where are we now? Degenerate...

We shoot our drugs up,
a heard write to your brain,
it helps to cover up our scars and pain...
one things can't be denied
livin's become a crime...
I hate to say it but the end is here...

Degeneration the future is lost in a loie
its just a sigh of the times..
Degeneration the past is all that is alive
No makin' up for the time that we kill
Degeneration the future is lost in a loie
its just a sigh of the times..
Degeneration the past is all that is alive,
Condition critical here..
