

Shake It Off

Richie Kotzen

Shake It off and let fools contemplate
Shake It off while the fools all debate

Cool as the ice I watch you shake in the glass
Love is just a drop in the hat
Surely its in your lying eyes
Your gonna wish gonna wish some day
Poor old me I was crucified for being fair to you baby
Every time, you paint me with bullshit somehow I'm the misfit
Discussion nothing's worth it

Shake It off and let fools contemplate
Shake It off while the fools all debate

Try moving on o wait your stuck in the drama
You've been way too long
Wild in your gypsy waltz your spinning, spinning round and round
King for a day that satisfies you so well
With every second passing
O O O love that doesn't satisfy much
It's old it's another dead end

Shake It off and let fools contemplate
Shake It off while the fools all debate

Shake It off and let fools contemplate
You know you can shake it all off
You live your life while the fools all debate
Shake it all off you're better off to let fools contemplate
Shake it off I'm out while you fools all debate

Know yourself and know your worth it
Watch your back and keep your enemies close
Smack that bullshit off your shoulder
Shake it off
