Night Vision

Face down on the ground, you can't get up Broke down by the shouts, you've had enough Blacked out, backed up against the wall So scared, you swear you've lost it all Hang tight, hold tight, while the seas are off

If you're not afraid of the dark It's easy to see If you're not afraid of who you are It's easy to be

When the world is black and twisted Had the chance, but you know you missed it It's okay, your heart will find a way (the way) When the world is black and twisted Had the chance, but you know you missed it It's okay, your heart will find a way 'Cause it has night vision, night vision

You gotta wait out, lighthouse inside your chest Yeah, show's up, backs you up when you got nothing left

If you're not afraid of the dark It's easy to see If you're not afraid of who you are It's easy to be

When the world is black and twisted Had the chance, but you know you missed it It's okay, your heart will find a way (the way) When the world is black and twisted Had the chance, but you know you missed it It's okay, your heart will find a way 'Cause it has night vision, night vision

(Woah) [x4]

When the world is black and twisted Had the chance, but you know you missed it It's okay, your heart will find a way (the way) When the world is black and twisted Had the chance, but you know you missed it It's okay, your heart will find a way 'Cause it has night vision, night vision

(Woah) [x4]
