

# All Matter

Robert Glasper

We're all the same  
And all so very different  
Divine by design  
It all intertwines  
Ain't nothing new  
But we always changing  
Moving  
Still water's soft  
Yet so hard

So what is love?  
What is it?  
What's is love, what is it?  
Cool on the outside  
Hot in the middle  
Cool on the outside  
Hot in the middle  
You ain't even gotta try  
All you gotta do is realize  
You ain't even gotta try  
All you gotta do is realize

Oh one great big small thing  
Like pollen in the sping breeze  
A spec of dust in this vast universe  
Just like a rain drop  
Dropped in the sea of consciousness  
It's all matter  
Eh, it's all matter

So what is love?  
What is it?  
What's is love, what is it?  
Cool on the outside  
Hot in the middle  
Cool on the outside  
Hot in the middle oh  
You ain't even gotta try  
All you gotta do is realize  
You ain't even gotta try  
All you gotta do is realize  
You ain't even gotta try  
All you gotta do is realize  
You ain't even gotta try  
All you gotta do is realize  
It's all matter  
It's all matter  
Matter  
It's all matter  
It's all matter  
It's all matter  
It's all matter  
Matter  
It's all matter  
It's all matter  
It's all matter  
It's all matter

[illegible]
