

Forever

Robert Glasper

Can't believe that I get to look at you everyday
You're like a lullaby, where every note's placed perfectly
I just hope that I never have to watch the credits roll
'Cause it's a prayer of mine to be with you till we're grey and old

I just want this to last forever
Like a daydream that won't end ever
When the days get rough they'll get better
I just want this forever

Can't believe that I get to look at you everyday
You're my lullaby, with every note placed perfectly
I was so alone until this family made me whole
It's my prayer in life to be with you till we're grey and old

I just want this to last forever
Like a daydream that won't end ever
When the days get rough they'll get better
I just want this forever

You'll make the holidays a little easier to get through
And I don't want to even imagine living life without you
So can we just keep on going for all eternity
I don't want to wake up, can we just stay in love, yeah

I just want this to last forever
Like a daydream that won't end ever
When the days get rough they'll get better
I just want this forever
I just want this forever

I just want this to last forever
Like a daydream that won't end ever
When the days get rough they'll get better
I just want this forever

I just want this to last forever
Like a daydream that won't end ever
When the days get rough they'll get better
I just want this forever

I wished upon a star
And now here you are
