Stone Cold

Robert Palmer

Hey hey take it from me she's a masterpiece She ought to have her own show
Oh stone cold
Hey hey take it from me she's a masterpiece
Stone cold in love with you
Could you be ... or van gough

You're a work of art, my darlin'
You are the one I adore
You choose the role to star in
You've got the part - I'm all yours

My heart's in perpetual motion When you make love with me Beats so hard we reach an explosion Of sensuality

You are poetry - I read your lips They say just kiss me darling The way you move - the way you speak I got to have you cos I'm stone cold

Hey hey take it from me she's a masterpiece Stone cold in love with you She ought to have her own show Oh stone cold Hey hey take it from me she's a masterpiece Stone cold in love with you Could you be ... or van gough

You want it all - you got it You take the cake coz you wrote the recipe You hit the mark Spot on it

We make the grade coz we got the chemistry

Surfin' high on the waves of emotion When you make love with me 8 miles high and deep as the ocean That's how big love should be

You're a masterpiece - you're made for me I just couldn't live without you Say what you want - say what you need I'll get it for you cos I'm stone cold

Hey hey take it from me she's a masterpiece I'm stone cold in love with you She ought to have her own show Well stone cold Hey hey take it from me she's a masterpiece I'm stone cold in love with you Could you be ... or van gough

My heart's in perpetual motion When you make love with me

Beats so hard we reach an explosion Of sensuality

You are poetry - I read your lips
They say just kiss me darling
The way you move - the way you speak
I got to have you cos I'm stone cold

Hey hey take it from me she's a masterpiece Stone cold in love with you She ought to have her own show Babe I'm stone cold Hey hey take it from me she's a masterpiece Stone cold in love with you Could you be ... or van gough

Stone cold
Hey hey take it from me she's a masterpiece
Stone cold in love with you
She ought to have her own show
Babe I'm stone cold
Hey hey take it from me she's a masterpiece
Stone cold in love with you
Could you be ... or van gough
