

Feel Something

Robin Schulz

Been so long, I can't remember
How it feels to fall in deep
Look how to fall when there's nothing left when we end
Can you please leave that to me?

The touch of your hand
Lying here tonight
Who's got the chance?
Baby

Make me feel something
Make me feel something
With you, I feel something again

Even if it doesn't last forever
I don't need promises from you
But you can save me from places cold as winter
Stay, that's all you have to do

Make me feel something
Make me feel something

With the touch of your hand
Lying here tonight
Who's got the chance?
Baby

Make me feel something
Make me feel something
You know there's nothing that feels like love can
So make me feel something, oh
With you, I feel something again
