

# Make Me Feel the Night

Robin Schulz

We dance on the cliff as the stars look down, oh  
You don't say a word, but I feel the sound, oh

Just a casualty, you and me  
I need the fight  
But it's hard to breathe and I'm burning up inside  
Just one body, us together  
Just one less goodbye  
Hold me closer here forever  
Make me feel the night

Make me feel the night  
Make me feel the night  
Make me feel the night  
Feel the night  
Oh

Make me feel

Words spill from your lips and it taste like truth, I'm on to you  
One swing of your hips and I fall for you, I'm on to you

Just a casualty, you and me  
I need the fight  
But it's hard to breathe and I'm burning up inside  
Just one body, us together  
Just one less goodbye  
Hold me closer here forever  
Make me feel the night

Make me feel the night  
Make me feel the night  
Make me feel the night  
Feel the night  
Oh

Just one body, us together  
Just one less goodbye  
Hold me closer here forever  
Make me feel the night

Make me feel the night  
Make me feel the night  
Make me feel the night  
Make me feel the night  
Make me feel the night
