

Promise You the Stars

Robin Trower

You like to walk into the shadows
You like to play all in the dark
But take it with me
One of these days you'll go to far
Cast your pearls among the needy
And I will promise you the stars

You live your life under charmed stars
Recall the truth you once have known
'Cause now you're with me
You're runnin' way too far
Cast your pearls among the needy
And I will promise you the stars

You let them take your youth and beauty
Don't let them steal your heart and soul
They got your number
But they don't know who you are
Cast your pearls among the needy
And I will promise you the stars
