

Certified Rose

Roger Daltrey

If only I could have it, all your grace and your wonder
The way you unfold
You're the pride of my garden from winter to autumn
You're a story untold

You're the warmth who moves the ice of a winter storm
You give the strength to get me by when I'm alone
I never want to see you close
'Cause you're the one that I have chose
To be my certified rose

And as my life gets longer
There are so many ways that you change the time that I know
Like a spell from a gypsy
There's a magic within me from the seeds that you've sown

And when the wind decries your need I'm never cold
'Cause I just close my eyes to dream and feel your golden glow
And when your petals fall you will always bloom again
And all the world will come to know
That you're my certified rose

Ooo, and it's (?) and every bit of my heart knows why
I feel you, I feel you, I feel your love
And when your petals fall you'll always bloom again
And all the world will come to know
That you're my certified rose
