

Is There Anybody Out There?

Roger Daltrey

Where do you go in the dead of night
Use your body as a weapon when you get a girl in sight
In the night air Is there anybody out there?
Shadows on the ceiling, shadows on the wall
Beating in my heart if there's anyone at all
Who is out there Is there anybody out there?
I-I-I feel You seem so near to me
What do you do in the light of the moon
You're living with your dreams, 'cause it's gonna happen soon

In the cool air Is there anybody out there?
Pounding in the night, pounding in your head
Something's telling you that there's something left unsaid
Who is out there Is there anybody out there?
I-I-I feel You seem so near to me
Is there anybody out there who is waiting for me?
Is there anybody out there I've gotta see?
Well, what am I thinking, what did I say?
Is there anybody out there to take me away?
What am I hoping, can it be true
Is there anybody out there? Someone. . . like you.
What do you do when the daylight breaks?
You still haven't found him whatever it takes
In the dawn air Is there anybody out there?
Slipping and sliding, don't know where to go
Must be something wrong here, tell me if you know
If you're out there Is there anybody out there?
