

## Blues Jam

Rollins Band

They always pry  
They always want to know why  
And then they pull you in  
And then you want to die

You'll burn so deep inside  
And then it gets on top of you  
It won't let you go  
Believe me when I tell you  
Life will not break your heart  
It'll crush it

You never felt so good  
You never felt so well understood  
And then you open your heart right up  
And say come on in  
And then that's when you stop breathing, man  
And the bleeding will never end

Heart smasher  
Knives in your mind
