Just took off my thinking cap

It got filled up with too much crap

Sat underneath the table and waited for the scraps

Morsels from the feast that you used to bait the trap, yeah

You set your sights to shoot me like a pigeon made of clay You hit me but you missed me You can't catch me, there's no way, no

Go on try it again
Na ya missed me
All right stay with me son, we're working here
Ya ready, we'll see

I've watched you trash the mountain that was built before your time

You had to blow it up because you couldn't make the climb You hide behind your money, it's too much for me to take You and I both know you're just another junkie fake

Come on, burn out
Come on, burn out
Come on, burn out, burn out, burn out

The same way that it starts is the same way that it ends You watch them going up and you see them falling down again

It's such a long way down

Lets' See multiple nose jobs, breast augmentation definitely, d

yed hair, bleached teeth

They did something to your chin, don't know what that's about,

it's intense though

It's like putting pearls on swine

You can dress up a pig but it's still a pig isn't it

Oink, oink, oink ha ha
