

There's a Light

Rory Gallagher

There's a light that shines on me
ever since you came to me
It won't go, it won't go away
Now I know that you're gonna stay
Now that I know
your love means so much more to me now

Come here now baby
Now look what you've done to me now
I don't pray for what could have been
I feel I'm flyin naturally

I can fly but I won't go away
In your sky that's where I wanna stay

Come here now baby
Now look what you've done to me now
If I don't show would you know
where to look for me now

I do not stare absently
Counting waves up on the sea
Now I know where I wanna stay
There ain't no hard decisions to make

Come here now baby
Now look what you've done to me now
If I don't show would you know
who to send for me now

There's a light
There's a light
There's a light
