## **Embalming The Masses**

## **Rose Funeral**

Mutilate, strip the bodies flesh now beg Look into my eyes and pay I'm the creator of your grave

Flames are burning through, the skulls we'll crush once more Death awakens you, tonight we kill for gore
Masses are burned alive, these bodies rot to dust

Feasting on your limbs, with the stench of shit You're a fucking waste of life, I've come to kill

Faces putrify, the dead have risen back to life We rip the flesh, they torture through the light

Blood will spill, streets fill black with the darkest nights, to kill They cleanse the good to spill their guts Gore is what we killed them for!
