

Making a Bomb

Rosetta Stone

What's in you, secret
Far beneath the radar
Of very little value
Component parts are what we are

Where our eyes fall
Emphasise, demonise
This state of freefall
Guiding where our focus lies

They fool the world
They rule the world
They fool the world
They rule the world
They are making a bomb
They are making a bomb
They are making a bomb
They are making a bomb

Give us something new to fear
Something to outrage
Someone I can for this
A different man, from a different place

They fool the world
They rule the world
They fool the world
They rule the world

They are making a bomb
They are making a bomb
They are making a bomb

They are making a bomb

See them laughing at us
You act like you don't care
Yet you hate those who have very little
How the f*ck is that fair?

They fool the world
They rule the world
They fool the world
They rule the world
Where our eyes fall
Emphasise, demonise
This state of freefall
Guiding where our focus lies

They are making a killing
They are making a killing
They are making a killing
They are making a killing

They are making a bomb
They are making a bomb
They are making a bomb

They are making a bomb
They are making a bomb
They are making a bomb
They are making a bomb
They are making a bomb
