

Humans

Rosie Carney

Clouds are gathering at my door
Closer than they were before
I can't see the windows light
Don't know if it is day or night

Tell me that you've seen this place
Tell me that you can relate
Please just say
I'm only human too
I'm only human too
And that's what humans do
When they don't have a clue

There it is right on the floor
It's like I've travelled miles from shore
If I tell you how will you share the cure
And tell me you've been here before

Tell me that you've seen this place
And that I don't have to be brave
Please just say
I'm only human too
I'm only human too
And that's what humans do
When they don't have a clue
