

The Effects

Rotten Sound

Every time the wise of mankind
Ask how to save ourselves
The inventions are being questioned
But the root cause is being ignored

Making a less consuming working class in the West
Won't help us at all when the South doubles the effects
It's time to affect all the companies that want
To save money in the East

Taking down this system that grows
Is the way to go even when the system to kill is protected
By the greatest armies and the most corrupted leaders
Taking down this system that grows is the way to go

Making a less consuming working class in the West
Won't help us at all when the South doubles the effects
