

# I Want To Be In Love

Roy Harper

Standard tuning but the whole thing tuned WAY down (put capo on at 4th fret, then tune so it sounds at normal pitch, then take the capo off.)

The intro chord is described as 'x' below.

At the rising of the (Em) dove  
When the (x) dark betrayal (Em) fails  
I'll wake (D) up in love  
Where my (C) heart has lain (x) again

On the morning of the (Em) day  
When you (x) bring your things to (Em) stay  
Heaven (D) will pay  
They'll be (C) no more pain (x) again.

I (D) wanna be in love  
I wanna be in love  
I (C) want to be in love  
I (D) wanna be in love  
I wanna be in love  
I (C) want to be in love with (F\*) you (fiddly bit! - see below)  
In (F\*) love with you (Em) (x)
