

Medication

Royal Bliss

I don't really want to talk about it
I don't really want to waste my time
Everybody's got their ways around it
You've got yours and I've got mine
I don't need another intervention
I don't need another rescue line
Everybody's got their ways around it
You've got yours and I've got mine
You've got yours, now give me mine

Where's my, where's my medication?
Cause I'm about to lose my mind
Where's my, where's my medication?
Cause you pushed me one too many times
You've got yours, now give me mine
Medication

You're a walking contradiction
Don't tell me how to live my life
I can make my own decisions
You make yours and I'll make mine
You can take your words of wisdom
You can take that shit advice
You can take this conversation
And stick it where the sun don't shine
Stick it where the sun don't shine
You've got yours, now give me mine!

Where's my, where's my medication?
Cause I'm about to lose my mind
Where's my, where's my medication?
You pushed me one too many times
You've got yours, now give me mine
Medication...

(The youth of America of the 21st century is statistically 17 times more medicated than the previous generation, which was 5 times more medicated than the last!)

You've got yours, now give me mine
You've got yours, now give me mine
You've got yours, now give me mine
You've got yours, now give me mine

Where's my fucking medication?
Cause I'm about to lose my mind
Where's my, where's my medication?
You pushed me one too many times
You've got yours, now give me mine
You've got yours, now give me mine
You've got yours, now give me mine!
