## Flight

**Royal Hunt** 

Eyes of the night keepin' me right Engine's roaring like hell Wing on my side, shakes of the light Ready to go -I can tell

You better sit upright or you'll fall down No one's gonna help you miles around There's no place for tears or fear of heights Nothing - just the thunder of flights

Fly forever and try -Cross over the sky -Feelin' the wind blow. Cry for losers who died They're watching you fly -Over the rainbow

Scary how fast you're down in the dust, Watching the sign in the sky Kill or get killed, glory and thrill Waitin' for one who'll survive I had a dream last night and I say you burn Right on the edge of the point of no return No more excuses and no more comin' back Light of the sun - ifs turnin' black
