

Only One I See

Ruff Endz

Hey, I know what you're thinking, don't say anything, just listen

Infatuation
Elation
You give me
Elevation
I'm taken
Love waking
Up to you
No makeup
Let's keep it tight, no breakup
Never put me down, we stay up
I took my shot
Made the layup
I don't wanna be
A player

1000 women in the room
But you're the only one I see
There's 1 billion stars up in the sky
You're the only star I see
So many places I could be
But you're the only place to be
So many fish out in the sea
But you're the only one I see
The only one, the only one I need

Girl you lit the torch to my heart
Now I'm flaming
Girl you fill the space in my heart, that was vacant
Girl, there can be no other one, no replacement
Now baby it's only your love I'll be craving
I was late and
And you came just like an angel
So amazing
You calm me down
When I get impatient
Now I can see that forever

1000 women in the room
But you're the only one I see
There's 1 billion stars up in the sky
You're the only star I see
So many places I could be
But you're the only place to be
So many fish out in the sea
But you're the only one I see
The only one, the only one I need

I'm not gonna say I don't see them
I'm not gonna say they're not there
I'm not gonna say they're not worthy
Maybe I just don't care
Baby, you got my focus
My whole heart, I swear
Without you in my circle
I feel like a square

Girl with you the tire
Riding without a spare
I can be number one
But never as strong as a pair
Want you to be so close to me
That you see every dream in my heart
And baby I swear it was you from the start

1000 women in the room
But you're the only one I see
There's 1 billion stars up in the sky
You're the only star I see
So many places I could be
But you're the only place to be
So many fish out in the sea
But you're the only one I see
The only one, the only one I need
