

Running Through My Mind

Ruff Endz

Glowing in a sundress, looking like a snack
Tongue kissing in the drop with the seat back
Ecstasies in the air can you feel that?
I hear your body calling girl, fall back
You be loving my drip, my swag
Baby, all them other girls get the red flag
I can no longer wait, baby where are you at

You've been running through my mind all day
You've been running through my mind all day
You've been running through my mind all day
You must be tired girl
You've been running through my mind all day
You've been running through my mind all day
You've been running through my mind all day
You must be tired girl
Girl, you been running running running

We FaceTiming on the phone together
You got nothing on but my sweater
Every day from you is like forever
I don't wanna be away from you but girl however
I got a chase the money money bag
Be on my grind I stay in the lab
Now I'm rushing home to you
But on my way home, po-po got me with a speed trap

Glowing in a sundress, looking like a snack
Tongue kissing in the drop with the seat back
Ecstasies in the air can you feel that?
I hear your body calling girl, fall back
You be loving my drip, my swag
Baby, all them other girls get the red flag
I can no longer wait, baby where are you at

You've been running through my mind all day
You've been running through my mind all day
You've been running through my mind all day
You must be tired girl
You've been running through my mind all day
You've been running through my mind all day
You've been running through my mind all day
You must be tired girl
Girl, you been running running running

It's a, it's a vibe, when me and you together
Our love connection tougher than leather
But your skin so soft, soft like a feather, it's a
Full body kiss, go right by the dresser
Lips to lips, chest to breasts, can you feel the pressure
Mental stimulation, girl is a pleasure
Got me thinking to myself, when I see her I'm gon' tell her

You've been running through my mind all day
You've been running through my mind all day
You've been running through my mind all day
You must be tired girl

Girl, you been running running running
You must be tired girl
You've been running through my mind all day
You've been running through my mind all day
You've been running through my mind all day
You must be tired girl
Girl, you been running running running
You must be tired girl
