

# Firebreather

Running Wild

Three days of darkness, eternal night  
Celestial sign swallows up the light  
A raging storm, Armageddon's here  
The enslaved's hope is the evil's fear

He rides the wind on silent wings, Laserbeams ripping steel  
Black helicopters go up in flames, before they know that he's real

Firebreather, raging from the stormy sky  
Firebreather, smoke and thunder steal the light away

Black soldiers walk the gates of hell  
They drop their mask, they come off their shell  
Minotaurs and genetic beasts  
Invade the world with a bloody feast

He rides the wind on silent wings, Laserbeams ripping steel  
Black helicopters go up in flames, before they know that he's real

Firebreather, raging from the stormy sky  
Firebreather, smoke and thunder steal the light away

Man in black your time is up  
Universal law, you're outta luck  
No dirty tricks, no unfair fight  
He shoots your head off with his first strike

He rides the wind on silent wings, Laserbeams ripping steel  
Black helicopters go up in flames, before they know that he's real

Firebreather, raging for the stormy sky  
Firebreather, smoke and thunder steal the light away
