

## If I Dream

RuPaul

Night after night, I close my eyes and I wonder when the sun will rise

Day by day, I live my life and I try my best to do what's right

A moment of hope is all I need to keep me moving on

Through the dark, till I see what's left to be revealed to me

If I dream everything I wanna be, if I dream all the possibilities

If you just believe in your wildest dreams they will come true,  
they will come true

I set my sights on a shooting star, traveling and yet so far

It's just a dream in my heart, it'll always be the biggest part

When you go to sleep tonight, dream a little baby, dream

All the stars are in your eyes, dream a little baby, dream
