

Come Here

Sabrina Claudio

I'm dying to see you
You know what I'm fiending for
The only one to get to me
Only one to get this close

So, I want you to come here
I want you to come here
I just need you near
No matter how, just make it here
Now

How does it feel when you're roaming 'round my mind?
To be the only one that knows what's inside

I want you to come here
I want you to come here
I just need you near
No matter how, just make it here, oh

I want you to come here
(I want you to come here)
I just need you
(I want you to come here)
I want you (I want you to come here)
So, please baby, come here (I want you to come here)

So, I want you to come here
I want you to come here
I just need you near
No matter how, just make it here
