

Evil minds bent on destruction  
Ignoring the pleas of their race  
The final chapter in humanic abduction  
All signs of society erased  
People asking fewer questions  
Letting politicians do their thinking  
Not questioning nuclear judgement  
As warheads enter our space

Our atmosphere clouded with poison  
We're killing ourselves to live  
Filling the world with hate and dissension  
We'll have only our lives to give  
What we do now is the key to the future  
We'll only have ourselves to blame  
For arming the world with the tools of destruction  
Our ignorance means death

Warring on opposing nations  
Starvation amongst impoverished nations  
Outlook bleak for the world population  
Ignorance of mankind  
Clouding the world with residue  
Of man's toxic industry  
Slowly killing harmless victims  
Whose ignorance leaves them dead

Our atmosphere clouded with poison  
We're killing ourselves to live  
Filling the world with hate and dissension  
We'll have only our lives to give  
What we do now is the key to the future  
We'll only have ourselves to blame  
For arming the world with the tools of destruction  
Our ignorance means death

We're crowded with anger inventions of danger  
From man's diabolical mind  
Humanities dying no use in trying  
It's only a matter of time  
How long will it be before there's no air to breathe  
And our water is polluted water  
Ignorance runs rampant no one is caring  
Suicide of the human race

Ignorance
