

On My Left Side

Sad Harmony

So tired i came in
Into lands of my dreams
Intact silence she gave me
To be my guide

Day by day fade away
Only days with you shall
Outlast forever
When i'll be your most secret tear
Don't let me fall down
We're supposed to never say goodbye

We'd better get every dream away
We walk on down
We shouldn't even sleep, shadow haunts the night

Long way of passion
We came to your utmost shore
The taste of your young blood
I still feel in my frozen mouth
We can't play all the way
Not even human being shall
Outlast forever...

Which way to get up the stream
Which way to find you, when you can't
Find yourself, it's up to you
