

Unknown substance  
A putrid cloud  
Choking all within  
Results of progress  
A noxious waste  
Floating in the air

Living free? Chemically  
So now our world is fading  
into slowly burning out  
Prime Wealth? Toxic Health  
Advancing towards extinction  
is the way it's turning out  
Foul Air? Do you care?  
Is cleanness where you live  
Going against your common believe  
Too much slime, insufficient time?  
In a suffocated future  
will you find the time to breathe

Jammed in one place  
Blind in haste  
Progress can't wait  
A life in waste

Tending towards - Technology  
Reverse of: life's biology

Chemical comatose  
Radiation overdose  
Burning, melting flesh  
Leaking slime of dissolving waste  
Overflowing blackness of death

Creation is being torn down by abuse  
Infringement of the substance and our use  
Elements decomposing, dilution is too slow  
Every contribution to the evolution  
Its bad gets worse; deathly course

Swallowed in Black

Faced with reality?  
Search your memory  
Nothing dead ever comes back  
The Black
