

Go With the Flow

Saga

I never know where to go
Say it's so, like that
I remember you said "ain't it so"
But you know that I'm back

Echoes of the past bring questions for the future
I know I can face it without a replacement
As long as I take it...
Just one smile at a time

I go with the flow when it's right there in front of me
It's time to go when you know where you wanna be
I go with the flow now it's right here in front of me
You know I want it, I'll never stop it

I never knew just how few times that you looked back
Well, I'll just assume that you knew just how I'd react

Forward with no fear or sens of what comes after
I know we can make it when others have faked it
As long a we take it...
Just one smile at a time

I go with the flow when it's right there in front of me
It's time to go when you know where you wanna be
I go with the flow now it's right here in front of me
You know I want it, I'll never stop it

Take me down to the river
Walk me through the woods where you found me
Take me down to the river
Walk me through the woods where you found me

I go with the flow when it's right there in front of me
It's time to go when you know where you wanna be
I go with the flow now it's right here in front of me
You know I want it, I'll never stop it

I go with the flow when it's right there in front of me
It's time to go when you know where you wanna be
I go with the flow now it's right here in front of me
You know I want it, I'll never stop it
