

## (You Were) Never Alone

Saga

You're confused and desperate  
And there's no help in sight  
They've got you going round in circles  
They've got you running for your life  
All your cries for help  
Have fallen on deaf ears  
lost inside the system  
The things are not what they appear  
(Don't give in) Close your eyes and make a wish  
(Just don't give in) I don't know if you know this  
You were never alone, never without me  
Don't have to take it anymore  
Never alone  
It might be thunder and lightning  
Just another storm  
You were never alone, never without me  
Don't have to take this anymore  
Never alone, I'm coming out of the shadows  
To chase the demons from your door  
Your running out of answers  
And your back's against the wall  
You're asking for directions  
And no one hears your call  
You were never alone, never without me  
Don't have to take it anymore  
Never alone, I'm coming out of the shadows  
To chase the demons from your door  
Never alone (with or without me)
