

99 to the Moon

Said the Whale

You and I
Dancing to something that no one likes
Cuz you like the weight of the world sometimes
'99

Something about us just feels alright
You've got your problems and I've got mine
Feels like the weight of the world sometimes

But I love you to the moon
And back again
I love you to the moon
And back again
So don't you look at me with those big brown eyes
And walk away with them
I love you to the moon
And back again

You and I
Pounding the beat on our chests all night
Cuz you like the way that the kick drum flies
'99
Singing out loud on the bus at night
Cuz these are some words you can get behind
I said "slow down" but you stayed all night
You stayed all night, you stayed all night

I love you to the moon
And back again
I love you to the moon
And back again
So don't you look at me with those big brown eyes
And walk away with them
I love you to the moon
And back again

You and I
Making decisions that no one likes
But I can see you in our daughter's eyes
Dancing alone in our room at night
Watching our loved ones go on with life
Friday night but I feel alive
My heart is pounding like '99
And it feels like a kick drum inside my spine
And we danced all night
And we danced all night

I love you to the moon
And back again
I love you to the moon
And back again

I love you to the moon
And back again
I love you to the moon
And back again

I love you to the moon (So don't you look at me with those big brown eyes)

And back again

I love you to the moon (So don't you look at me with those big brown eyes)

And back again
