

Wake Up

Said the Whale

Wake up, wake up
Wake in the Sound to the rising sun
See a bright light shine on the lions
Morning red light on the horizon

Stay up, stay up
If you wanna see when the full moon comes
See a silver light shine on the island
See a silhouette off in the distance

Wake up, wake up
Bathe in the morning light
Safe in the warming light
Faith in the morning, alright

Time makes all things fall together
Time brings all things together

Time makes all things fall together
Time brings all things together

Wake up, wake up
Sleep till the sound of the nine 'o clock gun
Bright city lights in the reflection
Up all night til the morning comes

Stay up, stay up
Slip through the cracks of the morning rush
Find my faith in the place I love
Make my way to the place I love

Time makes all things fall together
Time brings all things together

Time makes all things fall together
Time brings all things together

Wake up wake up

Time makes all things fall together
Time brings all things together

Time makes all things fall together
Time brings all things together

Time makes all things fall together
Time brings all things together

Time makes all things fall together
Time brings all things together

Time makes all things fall together
Time brings all things together
