

Movie in My Mind

Saint Raymond

Tell me that you want me back
I tell you I do
Show me where your heart is at
Cuz I never knew
And I've been looking for the worst in us
You and I, you and I, we self-destruct
I told you that I want you back
Just tell me you do

Burning bridges one by one
Can we even right our wrongs
Feeling I'm where we belong
Afraid to see what we've become

You're the words on my tongue
To my favorite song
You're the first and the last thought
When all's said and done
You're the movie in my mind
To which I know every line
In all these things I do
All I see is you

I'm hoping that our hearts don't change
I really do
Keep hoping that it feels the same
When I'm holding you
And I've been tearing down the walls we built
With you and I, you and I, time stood still
I'm hoping that our hearts don't change
I really do

Burning bridges one by one
Can we even right our wrongs
Feeling I'm where we belong
Afraid to see what we've become

You're the words on my tongue
To my favorite song
You're the first and the last thought
When all's said and done
You're the movie in my mind
To which I know every line
In all these things I do
All I see is you

Hold me tight and break my bones
This page of ours we've left untold
Hold me tight and break my bones
This page of ours we've left untold

You're the words on my tongue
To my favorite song
You're the first and the last thought
When all's said and done
You're the movie in my mind
To which I know every line

In all these things I do
All I see

You're the words on my tongue
To my favorite song
You're the first and the last thought
When all's said and done
You're the movie in my mind
To which I know every line
In all these things I do
In all these things I do
In all these things I do
All I see is you
