One More Night

Saint Raymond

I miss Los Angeles
Whenever I'm home
I just can't wait to leave
Now I'm in a hotel alone
I seem to lose my way
And the end is in sight
Maybe I'm running blind

I miss the sunset
That I've never even seen
I want those grey skies
'Cause the sun's boring me
When the rain is on my face you know
I dream of far away
Maybe I'm running blind

You know I can't stay here for too long, for too long
So let's make the moment last before it's gone

So can we dance around forever
While we've still got the time?
'Cause when it's gone all you'll remember
Is who you had by your side
So let's stay up 'til the morning
Even if we never see the light
There's so much left to find
So just give me one more night

Our little universe
Was just four streets
But now it shows me on
With every stranger I meet
I've been miles and miles away
Carried by my own two feet
Maybe I'm running blind

You know I can't stay here for too long, for too long
So let's make the moment last before it's gone

So can we dance around forever
While we've still got the time?
'Cause when it's gone all you'll remember
Is who you had by your side
So let's stay up 'til the morning
Even if we never see the light
There's so much left to find
So just give me one more night

Right now you're standing in front of me
Right now we're all that we need to be
Right now it's you and me
Let's never look back, let's never go back
Right now you're standing in front of me
Right now we're all that we need to be
Right now it's you and me
Let's never go back, let's never look back

Can we dance around forever
While we've still got the time?
'Cause when it's gone all you'll remember
Is who you had by your side
So let's stay up 'til the morning
Even if we never see the light
There's so much left to find

So can we dance around forever
While we've still got the time?
'Cause when it's gone all you'll remember
Is who you had by your side
So let's stay up 'til the morning
Even if we never see the light
There's so much left to find
So just give me one more night
