

# Paradise People

Sam Sparro

Paradise [x8]

We are the Paradise People  
We are the moon and the stars  
We are the church and the steeple  
Sent down from Venus and Mars

We are the Paradise People (oh yes we are)  
We are the moon and the stars (moon and the stars)  
We are the church and the steeple (yes we are)  
Sent down from Venus and Mars

We won't expose the guile  
And we won't need to  
It shall avow itself to you  
Ear to the ground and head in the clouds

The same moon in the sky  
that reflects light  
Is the same moon that pulls the tide  
Do you know who you are?

We are the Paradise People (Paradise People)  
We are the moon and the stars (moon and the stars)  
We are the church and the steeple  
Sent down from Venus and Mars

We are the Paradise People (Paradise People)  
We are the moon and the stars (we are the moon and the stars)  
We are the church and the steeple (we're gonna hold you up tonight)  
Sent down from Venus and Mars

We the people of Paradise  
We can no longer hide in the night  
We must bring these secrets we've learned  
Into the light

Into the light [x8]

(We are) We are the Paradise People  
We are the moon and the stars (we are we are)  
We are the church and the steeple (we're gonna hold you up tonight)  
Sent down from Venus and Mars

We are the Paradise People (we are the people)  
We are the moon and the stars (we are the moon and stars)  
We are the church and the steeple (church and the steeple)  
Sent down from Venus and Mars

We are the moon and stars  
The church and steeple (church and the steeple)  
We are the people  
We are the moon and stars  
Forever and ever
