

Sun in Disguise

Sandra

I don't know your name or where you are
(But) every night you seem to real
Talking to me

Glowing Face behind the stars
Am I insane to get this far?
You're soothing my soul

The moon is like the sun in disguise
Shadows are seducing the lights

Touch my heart - receive the sign
Ready now to cross the line
Cause the night is my friend
Superseding
Grabbing your hand

The moon is like the sun in disguise
Shadows are seducing the lights
