

Sore Distress

Saosin

To pass away
And move into another shell
It takes my breath
Dislocate a second cell
Our faces show the timeline
Her heart stops being loved
Your voice sets the edition
To move into another cell
To pass away

Let me bend all
Into another
Where we get our way
Take me in your arms
Into another
Where we get our our way

(Your voice was unforgiving)

He's locked away
And moved into another shell
He took my place
And no one there could even tell
Our faces show the timeline
Her heart stops being loved
To pass away
And move into another dream

Let me bend all
Into another
Where we get away
Take me in your arms
Into another
Where we get our way

Your voice is unforgiving
This feeling's eating me alive
Our faces show the timeline (Oh god I can't stop spinning)
Her heart stops me in no time
Your voice sets the addition (It moves into another cell)
Won't stop me from insisting

Let me bend all
Into another
Where we get away
Take me in your arms
Into another
Where we get our way (It moves into another cell)
