

Diamonds

Sarah Darling

Butterflies don't get their wings overnight
They sacrifice so many things to one day fly
Crystallize your every dream
Don't let them float, don't let them be
Forever castles in the sky

Falling stars will shine brighter
Broken hearts will leave a fire
'Cause time and pressure gives you diamonds
Gives you diamonds

The quiet oak grows strong
Between opposing winds like you and me
The struggle helps us to believe
Pressure made us who we are
And it was worth every scar
To be standing here so close but yet so far

Falling stars will shine brighter
Broken hearts will leave a fire
'Cause time and pressure gives you diamonds
Gives you diamonds

Don't settle for stones
You're worth more than you know
But it hurts to grow
Don't hold on to let go
Turn your fear into hope
Look what happens to coal

Falling stars will shine brighter
Broken hearts will leave a fire
'Cause time and pressure gives you diamonds
Gives you diamonds
