

Wandering Star

Sarah Darling

She wants to fly, she knows it's real
She thinks she can, she knows she will
He had it all, had everything
He broke her heart; he broke her wings

Don't let another star fall down
Don't let another dream burn out

So wish upon a wandering star
You can go so far
Get lost, get found
Just follow your heart
And wish upon a wandering star

We need a light
A direction to go
We find a way
We find our way home

You're gonna fly, you know it's real
I know you can and I know you will

Don't let another star fall down
Don't let another dream burn out

So wish upon a wandering star
You can go so far
Get lost, get found
Just follow your heart
And wish upon a wandering star

So wish upon a wandering star
You can go so far
Get lost, get found
Just follow your heart
And wish upon a wandering star
