

# You Don't Have to Be Lonely Tonight

Sarah Darling

You don't have to be lonely baby  
One more night  
Something's tellin' me you  
Should give love one more try  
Every piece of your broken heart  
Let me hold it tight  
You don't have to be lonely baby tonight  
Do you remember  
How fallin' feels?  
It's been awhile  
You should know how my world  
Lights up each time you smile  
I won't promise you  
I know how to fix your life  
But you don't have to be lonely baby tonight

Lets not talk about forever  
Get me lost in your eyes  
One kiss at a time  
We could be so good together  
Like the moon and the tide  
We can dance through the night  
If you let me I'll stay right here  
Till the morning light  
But you don't have to be lonely baby tonight

Lets not talk about forever  
Get me lost in your eyes  
One kiss at a time  
We could be so good together  
Like the moon and the tide  
We can dance through the night  
If you let me I'll stay right here  
Till the morning light  
But you don't have to be lonely baby tonight

I don't know what to do  
With feelings that I can't hide  
Something's telling me you  
Should give love one more try  
Every piece of your broken heart  
Let me hold it tight  
Cause you don't have to be lonely baby tonight  
You don't have to be lonely baby tonight
