

# Build Me Up From Bones

Sarah Jarosz

Build me up from bones  
Wrap me up in skin  
Hold me close enough to breathe me in

The moon's a fingernail  
Scratching on the back  
Of the night in which we lay beside

I held every inch of you  
I wrote every line for you  
I made time when time was all but gone  
You're the love I've always known

The night's so dark and grey  
But you've helped me find my way  
Through the wild and wonders of this world

So take me with you now  
I need to show you how  
I can love you better than before

I held every inch of you  
I wrote every line for you  
I made time when time was all but gone  
You're the love I've always known

Play it sweet and low  
We've got no where to go  
I am yours and you're the love I know
