I found my space (come and drive with me)

The world is too small And it's hard to find some room Pay so much for walls around us And close in too soon We all hold for doors to open The place to rest our heads We get tired of all the driving And we break down in stead But that's not for you 'Cause you're part of my plan Throw the things that you're in love with In the back of my van And we'll just drive off to somewhere We'd both rather be Say that life's about the journey Come and drive it with me

'Cause I finally found my space
Come ride with me I've got some breathing room now
For the world's a better place
'Cause I finally found my space
I've got some breathing room now (got some breathing room now)
For you and me

I've got sunshine but once there was a grey
Got some money in my pocket
I put some more away
I've got my hands on the wheel
For the first time I see
That this life's about the journey
Come and drive it with me

'Cause I finally found my space
Come ride with me I've got some breathing room now
For the world's a better place
'Cause I finally found my space
I've got some breathing room now (got some breathing room now)
For you and me

A night on the road Cruisin' in the moonlight When we're together Everything feels so right Just like we're driving in a universe of two Tonight

So just kick back (relax)
And watch the world go by
Feel your worries disappearing
When you get by my side
And crank that cereal way up
And kickers into drive
'Cause this life's about the journey
And we're feeling alive

'Cause I finally found my space
Come ride with me I've got some breathing room now
For the world's a better place
'Cause I finally found my space
I've got some breathing room now (got some breathing room now)
For you and me
(2x)

Finally found my space
I've got some breathing room now
Right here
For you and me...
