You say you've got no reason why to get up and say goodbye but listen hard I let you know just one night and you won't go

I don't wanna hear you
I heard it all before
just give me one good reasonto not walk out the door

Let me have you girl

I will make you feel alright

Let me have you girl - it's alright - it's alright 
even if it takes all night

Let us get down on the floor satifaction I adore your body takes my breath away I promise you I'll make you stay

I don't wanna hear you
I heard it all before
just give me one good reasonto not walk out the door
